

Area of Jackson Street	Elizabeth Street to Britannia Street	Britannia Street to Richmond Street	Jackson Street as a whole
Look & Feel: What do you like about this area? What makes this area attractive? What things do you immediately notice that make the area look good or feel more pleasant? Might include buildings, street furniture, colours, plants, etc. How easy is it to access the buildings and shops?	Clean, variety of things to do, no dairy, smelly buses and bus stop, restricted space by bus stop and bus stop users, more seating near bus stop.	Dirty shop fronts, empty stores, cafes great - chocolate store, good amount of planter life, more flowers, empty store - not attractive.	Plants and greenry need more maintainence, island crossing needs more visability, potential plaques and tile project. Seating isn't great - doesn't feel safe, bollards, love the trees, more shade.
Spaces and Amenities: Which of these amenities can not be easily used and accessed by everyone? Which areas/amenities/services would benefit from more signs? How could we make this street more comfortable, user-friendly, accessible or social?	Some shops are run down or empty.	Chocolate store, path to the library.	Better bins - more bins and more frequent maintainence to minimise overflow of litter, shops with steps can be more accessable, colourful benches, more personalised, traffic jams (Victoria Street end of Jackson Street), electric/Lime scooters, public toilets need upgrading and small park (Fitzherbert Street).
Footpaths: How has it been walking on the footpath today? Is the footpath ... Wide enough to push a pram or ride a mobility scooter on? Wide enough for people to pass each other if pushing prams or riding mobility scooters? Wide enough for people to stop and chat but still allow others to easily pass? Smooth? Level? Clean and tidy and free of litter? Clear of obstructions?	Shop signage make it hard for people to pass on footpath, construction flows onto footpath and is difficult to pass by.	Need better locations for wheel bins - get in the way when passing on footpath, Clean and smooth footpath, obstruction for width, scaffolding from construction site, footpath bricks not level.	Electric/Lime scooters are seperated and need to be grouped together.
Crossing Roads - Jackson Street: Have you crossed the road today? Tell me about that experience. Is there a pedestrian crossing across Jackson Street in this area? If yes, is the crossing accessible? Are pedestrians waiting to cross easily visible to road users? Is the crossing in the right place?	Enough pedestrian crossings.	Enough pedestrian crossings.	Lights at Britannia crossing is busy and sometimes intimidating to cross - try to avoid and wouldn't choose to cross, light poles were obvious. Better having less car parks, mass crossings is safer i.e. Queensgate, if traffic was slower it would be safer.
Feeling of Safety: How safe do you think this area would be to walk through... During the day (6am - 6pm), In the evening (6pm - 10pm), At night (10pm - 6am)		During the day (6am - 6pm) and in the evening (6pm - 10pm) - Very safe, good amount of light.	Busy traffic feels unsafe - do road users know where upcoming crossing are? slow down sign would help safety.
Improving Safety: What would make you feel safer?	Cleaner footpath needed, gum and moss present.		More benches, wider footpath.
Any other concerns or anything else you'd like to share about improving Jackson Street?	More telephone boxes.	Street signage with street names on the corner of each street is very liked and helpful for road users for directions awareness - luminous.	Planting is great, flowers adds more colour, would like to see indiginious art, love local feel.
