

Area of Jackson Street	Cuba Street to Tory Street	Cuba Street to Bolton Street	Buick Street to Elizabeth Street
Look & Feel: What do you like about this area? What makes this area attractive? What things do you immediately notice that make the area look good or feel more pleasant? Might include buildings, street furniture, colours, plants, etc. How easy is it to access the buildings and shops?	Much the same, architecture is welcoming, aesthetic, food, colourful tiles and murals on entrance ways, Maori artwork/murals would represent us.	Rubbish bins are tilted and need maintenance, More rubbish bins needed on corners of street.	Okay but dirty, needs more greenery and trees, Plenty of Cafe seating, sushi store is good.
Spaces and Amenities: Which of these amenities can not be easily used and accessed by everyone? Which areas/amenities/services would benefit from more signs? How could we make this street more comfortable, user-friendly, accessible or social?	Not as sloped.	Wider footpath, shopfront entrance humps and ledges could be improved to be more assessable for people.	
Footpaths: How has it been walking on the footpath today? Is the footpath ... Wide enough to push a pram or ride a mobility scooter on? Wide enough for people to pass each other if pushing prams or riding mobility scooters? Wide enough for people to stop and chat but still allow others to easily pass? Smooth? Level? Clean and tidy and free of litter? Clear of obstructions?	Sloped and bumpy pavement, more benches, fountain tiles can be slippery, more greenery and trees, colourful tiles, mobility challanges, colours arn't great.	Front bumper of parked cars overhang on to the footpath which narrows the available space of the footpath, electric scooters parked in the way of walkway, mostly clean and litter free.	Footpath needs to be wider and needs more rubbish bins present.
Crossing Roads - Jackson Street: Have you crossed the road today? Tell me about that experience. Is there a pedestrian crossing across Jackson Street in this area? If yes, is the crossing accessible? Are pedestrians waiting to cross easily visible to road users? Is the crossing in the right place?	Crossing can be dangerous - more visability needed for pedestrians - lighting, crossings outside dominos, sloped pavement is not good accessibilty for mobility scooters and elderly, bins overflowed - need a better design.	Enough crossings but could have more, flatter and wider roads wanted.	Good amount of places to cross.
Feeling of Safety: How safe do you think this area would be to walk through... During the day (6am - 6pm), In the evening (6pm - 10pm), At night (10pm - 6am)	Not so safe at night - hard to see and low light levels.	Very safe	
Improving Safety: What would make you feel safer?		Enough light at night.	
Any other concerns or anything else you'd like to share about improving Jackson Street?
