Gambling Venue Policy Submission - Proposal to Remove the 12 Existing Gaming Machines from Naenae Bowling Club

I strongly oppose Council's proposal to remove the Naenae Bowling Club's 12 gaming machines, for the following reasons:

- The club has operated gaming machines responsibly for over 20 years.
- The gaming machines provide a vital revenue source for the club. The machines help the club to meet the significant costs associated with maintaining and operating the world-class facility. If the gaming machines were to be removed by Council, this would cause significant financial pressure for the club.
- The removal of existing use rights is unprecedented, grossly unfair, and totally undermines the considerable planning and budgeting made by the club when deciding to move to the current location.
- The proposal unfairly targets and singles out the Naenae Bowling Club. None of the other 29 gaming machine venues in Hutt City will be required by Council to remove their gaming machines.
- Removal of the club's gaming machines will do nothing to help reduce problem gambling. Any problem gamblers who may have used the club's machines will simply move and play one of the other 426 gaming machines located in Hutt City, or worse, gamble online.
- Moving the gambling spend away from a club environment to a commercial pub environment is likely to increase the risk of gambling harm, as clubs provide a safer environment in which to participate in gaming machine gambling than pubs.
- One hundred percent of the profits from the club's gaming machines remain within Hutt City (they are used by the club to maintain and improve the club). If the spend moved to the gaming machines located in the nearby commercial venues, then only around 16% of the machine proceeds would be returned to Hutt City in grants.

- The proposal unfairly targets and singles out the Naenae Bowling Club. None of the other 29 gaming machine venues in Hutt City will be required by Council to remove their gaming machines.
- Removal of the club's gaming machines will do nothing to help reduce problem gambling. Any problem gamblers who may have used the club's machines will simply move and play one of the other 426 gaming machines located in Hutt City, or worse, gamble online.
- Moving the gambling spend away from a club environment to a commercial pub environment is likely to increase the risk of gambling harm, as clubs provide a safer environment in which to participate in gaming machine gambling than pubs.
- One hundred percent of the profits from the club's gaming machines remain within Hutt City (they are used by the club to maintain and improve the club). If the spend moved to the gaming machines located in the nearby commercial venues, then only around 16% of the machine proceeds would be returned to Hutt City in grants.

Gambling Venue Policy Submission - Proposal to Remove the 12 Existing Gaming Machines from Naenae Bowling Club

I strongly oppose Council's proposal to remove the Naenae Bowling Club's 12 gaming machines, for the following reasons:

- The club has operated gaming machines responsibly for over 20 years.
- The gaming machines provide a vital revenue source for the club. The machines help the club to meet the significant costs associated with maintaining and operating the world-class facility. If the gaming machines were to be removed by Council, this would cause significant financial pressure for the club.
- The removal of existing use rights is unprecedented, grossly unfair, and totally undermines the considerable planning and budgeting made by the club when deciding to move to the current location.
- The proposal unfairly targets and singles out the Naenae Bowling Club. None of the other 29 gaming machine venues in Hutt City will be required by Council to remove their gaming machines.
- Removal of the club's gaming machines will do nothing to help reduce problem gambling. Any problem gamblers who may have used the club's machines will simply move and play one of the other 426 gaming machines located in Hutt City, or worse, gamble online.

Gambling Venue Policy Submission - Proposal to Remove the 12 Existing Gaming Machines from Naenae Bowling Club

I strongly oppose Council's proposal to remove the Naenae Bowling Club's 12 gaming machines, for the following reasons:

- The club has operated gaming machines responsibly for over 20 years.
- The gaming machines provide a vital revenue source for the club. The machines help the club to meet the significant costs associated with maintaining and operating the world-class facility. If the gaming machines were to be removed by Council, this would cause significant financial pressure for the club.
- The removal of existing use rights is unprecedented, grossly unfair, and totally undermines the considerable planning and budgeting made by the club when deciding to move to the current location.
- The proposal unfairly targets and singles out the Naenae Bowling Club. None of the other 29 gaming machine venues in Hutt City will be required by Council to remove their gaming machines.
- Removal of the club's gaming machines will do nothing to help reduce problem gambling. Any problem gamblers who may have used the club's machines will simply move and play one of the other 426 gaming machines located in Hutt City, or worse, gamble online.
- Moving the gambling spend away from a club environment to a commercial pub environment is likely to increase the risk of gambling harm, as clubs provide a safer environment in which to participate in gaming machine gambling than pubs.
- One hundred percent of the profits from the club's gaming machines remain within Hutt City (they are used by the club to maintain and improve the club). If the spend moved to the gaming machines located in the nearby commercial venues, then only around 16% of the machine proceeds would be returned to Hutt City in grants.

- The removal of existing use rights is unprecedented, grossly unfair, and totally undermines the considerable planning and budgeting made by the club when deciding to move to the current location.
- The proposal unfairly targets and singles out the Naenae Bowling Club. None of the other 29 gaming machine venues in Hutt City will be required by Council to remove their gaming machines.
- Removal of the club's gaming machines will do nothing to help reduce problem gambling. Any problem gamblers who may have used the club's machines will simply move and play one of the other 426 gaming machines located in Hutt City, or worse, gamble online.
- Moving the gambling spend away from a club environment to a commercial pub environment is likely to increase the risk of gambling harm, as clubs provide a safer environment in which to participate in gaming machine gambling than pubs.
- One hundred percent of the profits from the club's gaming machines remain within Hutt City (they are used by the club to maintain and improve the club). If the spend moved to the gaming machines located in the nearby commercial venues, then only around 16% of the machine proceeds would be returned to Hutt City in grants.

Gambling Venue Policy Submission - Proposal to Remove the 12 Existing Gaming Machines from Naenae Bowling Club

I strongly oppose Council's proposal to remove the Naenae Bowling Club's 12 gaming machines, for the following reasons:

- The club has operated gaming machines responsibly for over 20 years.
- The gaming machines provide a vital revenue source for the club. The machines help the club to meet the significant costs associated with maintaining and operating the world-class facility. If the gaming machines were to be removed by Council, this would cause significant financial pressure for the club.
- The removal of existing use rights is unprecedented, grossly unfair, and totally undermines the considerable planning and budgeting made by the club when deciding to move to the current location.
- The proposal unfairly targets and singles out the Naenae Bowling Club. None of the other 29 gaming machine venues in Hutt City will be required by Council to remove their gaming machines.

- Moving the gambling spend away from a club environment to a commercial pub environment is likely to increase the risk of gambling harm, as clubs provide a safer environment in which to participate in gaming machine gambling than pubs.
- One hundred percent of the profits from the club's gaming machines remain within Hutt City (they are used by the club to maintain and improve the club). If the spend moved to the gaming machines located in the nearby commercial venues, then only around 16% of the machine proceeds would be returned to Hutt City in grants.

Gambling Venue Policy Submission - Proposal to Remove the 12 Existing Gaming Machines from Naenae Bowling Club

I strongly oppose Council's proposal to remove the Naenae Bowling Club's 12 gaming machines, for the following reasons:

- The club has operated gaming machines responsibly for over 20 years.
- The gaming machines provide a vital revenue source for the club. The machines help the club to meet the significant costs associated with maintaining and operating the world-class facility. If the gaming machines were to be removed by Council, this would cause significant financial pressure for the club.
- The removal of existing use rights is unprecedented, grossly unfair, and totally undermines the considerable planning and budgeting made by the club when deciding to move to the current location.
- The proposal unfairly targets and singles out the Naenae Bowling Club. None of the other 29 gaming machine venues in Hutt City will be required by Council to remove their gaming machines.
- Removal of the club's gaming machines will do nothing to help reduce problem gambling. Any problem gamblers who may have used the club's machines will simply move and play one of the other 426 gaming machines located in Hutt City, or worse, gamble online.
- Moving the gambling spend away from a club environment to a commercial pub environment is likely to increase the risk of gambling harm, as clubs provide a safer environment in which to participate in gaming machine gambling than pubs.
- One hundred percent of the profits from the club's gaming machines remain within Hutt City (they are used by the club to maintain and improve the club). - The gaming machines provide a vital revenue source for the club. The machines help the club to meet the significant costs associated with maintaining and operating the world-class facility. If the gaming machines were to be removed by Council, this would cause significant financial pressure for the club.
- The removal of existing use rights is unprecedented, grossly unfair, and totally undermines the considerable planning and budgeting made by the club when deciding to move to the current location.
- The proposal unfairly targets and singles out the Naenae Bowling Club. None of the other 29 gaming machine venues in Hutt City will be required by Council to remove their gaming machines.
- Removal of the club's gaming machines will do nothing to help reduce problem gambling. Any problem gamblers who may have used the club's machines will simply move and play one of the other 426 gaming machines located in Hutt City, or worse, gamble online.
- Moving the gambling spend away from a club environment to a commercial pub environment is likely to increase the risk of gambling harm, as clubs provide a safer environment in which to participate in gaming machine gambling than pubs.
- One hundred percent of the profits from the club's gaming machines remain within Hutt City (they are used by the club to maintain and improve the club). If the spend moved to the gaming machines located in the nearby commercial venues, then only around 16% of the machine proceeds would be returned to Hutt City in grants.

Gambling Venue Policy Submission - Proposal to Remove the 12 Existing Gaming Machines from Naenae Bowling Club

I strongly oppose Council's proposal to remove the Naenae Bowling Club's 12 gaming machines, for the following reasons:

- The club has operated gaming machines responsibly for over 20 years.
- The gaming machines provide a vital revenue source for the club. The machines help the club to meet the significant costs associated with maintaining and operating the world-class facility. If the gaming machines were to be removed by Council, this would cause significant financial pressure for the club.
- The removal of existing use rights is unprecedented, grossly unfair, and totally undermines the considerable planning and budgeting made by the club when deciding to move to the current location.

- Moving the gambling spend away from a club environment to a commercial pub environment is likely to increase the risk of gambling harm, as clubs provide a safer environment in which to participate in gaming machine gambling than pubs.
- One hundred percent of the profits from the club's gaming machines remain within Hutt City (they are used by the club to maintain and improve the club). If the spend moved to the gaming machines located in the nearby commercial venues, then only around 16% of the machine proceeds would be returned to Hutt City in grants.

Gambling Venue Policy Submission - Proposal to Remove the 12 Existing Gaming Machines from Naenae Bowling Club

I strongly oppose Council's proposal to remove the Naenae Bowling Club's 12 gaming machines, for the following reasons:

- The club has operated gaming machines responsibly for over 20 years.
- The gaming machines provide a vital revenue source for the club. The machines help the club to meet the significant costs associated with maintaining and operating the world-class facility. If the gaming machines were to be removed by Council, this would cause significant financial pressure for the club.
- The removal of existing use rights is unprecedented, grossly unfair, and totally undermines the considerable planning and budgeting made by the club when deciding to move to the current location.
- The proposal unfairly targets and singles out the Naenae Bowling Club. None of the other 29 gaming machine venues in Hutt City will be required by Council to remove their gaming machines.
- Removal of the club's gaming machines will do nothing to help reduce problem gambling. Any problem gamblers who may have used the club's machines will simply move and play one of the other 426 gaming machines located in Hutt City, or worse, gamble online.
- Moving the gambling spend away from a club environment to a commercial pub environment is likely to increase the risk of gambling harm, as clubs provide a safer environment in which to participate in gaming machine gambling than pubs.
- One hundred percent of the profits from the club's gaming machines remain within Hutt City (they are used by the club to maintain and improve the club). - The club has operated gaming machines responsibly for over 20 years.
- The gaming machines provide a vital revenue source for the club. The machines help the club to meet the significant costs associated with maintaining and operating the world-class facility. If the gaming machines were to be removed by Council, this would cause significant financial pressure for the club.
- The removal of existing use rights is unprecedented, grossly unfair, and totally undermines the considerable planning and budgeting made by the club when deciding to move to the current location.
- The proposal unfairly targets and singles out the Naenae Bowling Club. None of the other 29 gaming machine venues in Hutt City will be required by Council to remove their gaming machines.
- Removal of the club's gaming machines will do nothing to help reduce problem gambling. Any problem gamblers who may have used the club's machines will simply move and play one of the other 426 gaming machines located in Hutt City, or worse, gamble online.
- Moving the gambling spend away from a club environment to a commercial pub environment is likely to increase the risk of gambling harm, as clubs provide a safer environment in which to participate in gaming machine gambling than pubs.
- One hundred percent of the profits from the club's gaming machines remain within Hutt City (they are used by the club to maintain and improve the club). If the spend moved to the gaming machines located in the nearby commercial venues, then only around 16% of the machine proceeds would be returned to Hutt City in grants.

- Moving the gambling spend away from a club environment to a commercial pub environment is likely to increase the risk of gambling harm, as clubs provide a safer environment in which to participate in gaming machine gambling than pubs.
- One hundred percent of the profits from the club's gaming machines remain within Hutt City (they are used by the club to maintain and improve the club). If the spend moved to the gaming machines located in the nearby commercial venues, then only around 16% of the machine proceeds would be returned to Hutt City in grants.

Gambling Venue Policy Submission - Proposal to Remove the 12 Existing Gaming Machines from Naenae Bowling Club

I strongly oppose Council's proposal to remove the Naenae Bowling Club's 12 gaming machines, for the following reasons:

- The club has operated gaming machines responsibly for over 20 years.
- The gaming machines provide a vital revenue source for the club. The machines help the club to meet the significant costs associated with maintaining and operating the world-class facility. If the gaming machines were to be removed by Council, this would cause significant financial pressure for the club.
- The removal of existing use rights is unprecedented, grossly unfair, and totally undermines the considerable planning and budgeting made by the club when deciding to move to the current location.
- The proposal unfairly targets and singles out the Naenae Bowling Club. None of the other 29 gaming machine venues in Hutt City will be required by Council to remove their gaming machines.
- Removal of the club's gaming machines will do nothing to help reduce problem gambling. Any problem gamblers who may have used the club's machines will simply move and play one of the other 426 gaming machines located in Hutt City, or worse, gamble online.
- Moving the gambling spend away from a club environment to a commercial pub environment is likely to increase the risk of gambling harm, as clubs provide a safer environment in which to participate in gaming machine gambling than pubs.
- One hundred percent of the profits from the club's gaming machines remain within Hutt City (they are used by the club to maintain and improve the club). - The club has operated gaming machines responsibly for over 20 years.
- The gaming machines provide a vital revenue source for the club. The machines help the club to meet the significant costs associated with maintaining and operating the world-class facility. If the gaming machines were to be removed by Council, this would cause significant financial pressure for the club.
- The removal of existing use rights is unprecedented, grossly unfair, and totally undermines the considerable planning and budgeting made by the club when deciding to move to the current location.
- The proposal unfairly targets and singles out the Naenae Bowling Club. None of the other 29 gaming machine venues in Hutt City will be required by Council to remove their gaming machines.
- Removal of the club's gaming machines will do nothing to help reduce problem gambling. Any problem gamblers who may have used the club's machines will simply move and play one of the other 426 gaming machines located in Hutt City, or worse, gamble online.
- Moving the gambling spend away from a club environment to a commercial pub environment is likely to increase the risk of gambling harm, as clubs provide a safer environment in which to participate in gaming machine gambling than pubs.
- One hundred percent of the profits from the club's gaming machines remain within Hutt City (they are used by the club to maintain and improve the club). If the spend moved to the gaming machines located in the nearby commercial venues, then only around 16% of the machine proceeds would be returned to Hutt City in grants.

- Removal of the club's gaming machines will do nothing to help reduce problem gambling. Any problem gamblers who may have used the club's machines will simply move and play one of the other 426 gaming machines located in Hutt City, or worse, gamble online.
- Moving the gambling spend away from a club environment to a commercial pub environment is likely to increase the risk of gambling harm, as clubs provide a safer environment in which to participate in gaming machine gambling than pubs.
- One hundred percent of the profits from the club's gaming machines remain within Hutt City (they are used by the club to maintain and improve the club). If the spend moved to the gaming machines located in the nearby commercial venues, then only around 16% of the machine proceeds would be returned to Hutt City in grants.

Gambling Venue Policy Submission - Proposal to Remove the 12 Existing Gaming Machines from Naenae Bowling Club

I strongly oppose Council's proposal to remove the Naenae Bowling Club's 12 gaming machines, for the following reasons:

- The club has operated gaming machines responsibly for over 20 years.
- The gaming machines provide a vital revenue source for the club. The machines help the club to meet the significant costs associated with maintaining and operating the world-class facility. If the gaming machines were to be removed by Council, this would cause significant financial pressure for the club.
- The removal of existing use rights is unprecedented, grossly unfair, and totally undermines the considerable planning and budgeting made by the club when deciding to move to the current location.
- The proposal unfairly targets and singles out the Naenae Bowling Club. None of the other 29 gaming machine venues in Hutt City will be required by Council to remove their gaming machines.
- Removal of the club's gaming machines will do nothing to help reduce problem gambling. Any problem gamblers who may have used the club's machines will simply move and play one of the other 426 gaming machines located in Hutt City, or worse, gamble online.

Gambling Venue Policy Submission - Proposal to Remove the 12 Existing Gaming Machines from Naenae Bowling Club

I strongly oppose Council's proposal to remove the Naenae Bowling Club's 12 gaming machines, for the following reasons:

- The club has operated gaming machines responsibly for over 20 years.
- The gaming machines provide a vital revenue source for the club. The machines help the club to meet the significant costs associated with maintaining and operating the world-class facility. If the gaming machines were to be removed by Council, this would cause significant financial pressure for the club.
- The removal of existing use rights is unprecedented, grossly unfair, and totally undermines the considerable planning and budgeting made by the club when deciding to move to the current location.
- The proposal unfairly targets and singles out the Naenae Bowling Club. None of the other 29 gaming machine venues in Hutt City will be required by Council to remove their gaming machines.
- Removal of the club's gaming machines will do nothing to help reduce problem gambling. Any problem gamblers who may have used the club's machines will simply move and play one of the other 426 gaming machines located in Hutt City, or worse, gamble online.
- Moving the gambling spend away from a club environment to a commercial pub environment is likely to increase the risk of gambling harm, as clubs provide a safer environment in which to participate in gaming machine gambling than pubs.
- One hundred percent of the profits from the club's gaming machines remain within Hutt City (they are used by the club to maintain and improve the club). If the spend moved to the gaming machines located in the nearby commercial venues, then only around 16% of the machine proceeds would be returned to Hutt City in grants.
